Extension Experts Directory

2020 Edition

Foreword

This Extension Experts Directory is purposely prepared by the Extension Services Management Office to introduce to Tarlac State University's various clientele the diverse group of faculty experts who had been and/or are engaged in a wide range of extension programs, projects, and activities.

This edition features a total of 168 faculty members from the University's nine colleges (School of Law not included) and contains extension-related information such as educational background, fields of expertise, and recent extension experiences to give readers an idea of what extension services the faculty experts can offer. This directory is organized by college, then by department/program.

It is hoped that through the faculty members' expertise and heart for service, the University may help uplift the socio-cultural, technological, educational, and environmental conditions of the populace towards sustainable development.
